**DETAILED ACTION**

***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-7, drawn to an Avian Malabsorption Syndrome disease vaccine.

Group II, claim(s) 8 and 10, drawn to a method or use of making a vaccine against disease conditions form Avian Malabsorption Syndrome.

Group III, claim(s) 9, drawn to a method of vaccinating against disease conditions associated with Avian Malabsorption Syndrome.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the claims are directed to a vaccine against Avian Malabsorption Syndrome disease, methods of making the vaccine and using the vaccine.

However, because Sharma (US Pat. 6,406,702 B1) teach a vaccine based on avian reovirus, avian adenovirus and infectious bursal disease virus in addition to methods of making and using such a vaccine. Even though Sharma do not teach Avian Malabsorption Syndrome, since the vaccine taught by Sharma would treat infections caused by the viruses that cause such a syndrome, Sharma's vaccine would inherently vaccinate against the syndrome as well. *See columns 4 and 8.* Therefore, no special technical feature exists for groups I-III as defined by PCT Rule 13.2, because it does not define a contribution over the prior art. Note that PCT Rule

13 does not provide for multiple products or methods within a single application. Because the technical feature of Groups I-III is not a special technical feature, unity of invention is lacking.

### ***Conclusion***

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder

in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoiner.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
